

DESIGNTEK

CARBON FIBRE SEAT

Ultimate in design and technology, Designtek seats are a unique option for any high performance vehicle. Each seat design is tested to the extreme in fast road and race conditions.

Driver's concentration should focus purely on the road ahead. DesignTek seats are designed to stop the driver rolling from side to side. The seats are designed to give the ultimate in safety and reduce body movement.

DesignTek high gloss carbon fibre racing seats weigh just 6.5kg each, built to withstand the most extreme loads, their unique design offers the driver an excellent driving position and unrivalled safety in every situation.

Two styles are available, the GTR and the Spider Seats, each individual seat is supplied with anodized universal side brackets.

DesignTek Seats can be used together with standard seat belts or harnesses. DesignTek three four five and six point harnesses are also available.

Available in : Cloth, Suede, or Leather. Choice of colours
